U. S. Patent and Trademark Office PTO-326 (Rev. 3-97)

Part of Pap r No.

Application/Control Number: 09/254316

Art Unit: 1754

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a composition.

Group II, claim(s) 4-6, drawn to making the composition.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common feature is graphite along with the surface material, however this is not patentable as evidenced by Search Report

Document 09147916, which discloses the composition. Therefore, there is no patentable special technical feature linking the groups and so the patentability thereof resides within each respective group. It is further noted that the composition may be made in a different manner, such as by direct coating without using the aqueous solution and that the groups are classified separately- in classes 429 and 427 respectively. Therefore, the propriety of the restriction has been established.

A telephone call was made to Mr. Kolasch on 6/21/2000 to request an oral election to the above restriction requirement, but did not result in an election being made.

Application/Control Number: 09/254316

Art Unit: 1754

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (703) 308-2539.

Stuart Hendrickson
